## **FREE-RANGE CHICKENS**

Lilydale farms are all accredited by FREPA and are regularly audited during their growing cycle to ensure the standards are met. Lilydale aims to exceed the standards set by FREPA wherever possible, providing the most comfortable living conditions for its chickens to ensure both a premium and ethically sound product.

## **STANDARDS**

Once fully feathered, Lilydale chickens can roam outside during the day and forage amongst natural vegetation. Free-range chickens have lower stocking densities than conventional chickens and growth promoters are not permitted. Chickens grow naturally and you know it's free range if it bears the logo of Free Range Egg and Poultry Australia (FREPA).

## **BARN & PADDOCKS**

Lilydale's unique barns allow for virtually an entire section of the side of the barn to be opened, giving chickens the best access to paddocks possible during daylight hours to encourage them to venture outside. This provides twice the amount of outdoor access than the standard stipulated by FREPA. When roaming inside their barn, Lilydale chickens have ample access to food and water at all times.
